

CORN

Corn, Bodacious- 80-90 days. Popular yellow variety grows 7ft tall. 8"ears with richly flavored, tender kernals. Perfect for the Sacramento area.

Corn, Peaches and Cream hyb- 80 days. An early and delicious bi-color. Ears ave 8"with both white and yellow sugar-sweet kernels. Hold flavor well.

Corn, Juibilee hyb- 85 days. A long-time favorite sweet corn. 9"ears have deep yellow kernels. Great late season variety. Holds sweetness well on plant, and a short time after picking.

Corn, Silver Queen hyb- 92 days. Best sweet white variety on the market. Tall stalks support several ears each.

Corn, Early Sunglow hyb - 62 days. A very early and reliable producer. 5'tall stalks bear several 6-7"ears packed with plump yellow kernels. Think corn by 4th of July!
